Key Improvement Strategies	Is this KIS selected for focus this year?	
KIS 2.a Professional leadership	Develop an organisational climate that promotes role clarity, responsibility and shared accountability to support student learning growth.	Yes
KIS 2.b Excellence in teaching and learning	Build school-wide capability to effectively use assessment data in planning and teaching.	Yes
KIS 2.c Excellence in teaching and learning	Build all teachers' capability to integrate high impact teaching strategies within an agreed, evidence-based instructional model.	No
Explain why the school has selected this KIS as a focus for this year. Please make reference to the self-evaluation, relevant school data, the progress against School Strategic Plan (SSP) goals, targets, and the diagnosis of issues requiring particular attention.	Assessed as evolving in FISO Assessment and looking at 2023 data, there seems to be a disconnect between teachers using various forms of assessment data in their planning and teaching. Through observing classrooms and PLC work, it is clear that using assessment data in planning and teaching is happening; perhaps understanding different the types of data should be a focus, as formative data collection is just as valuable as summative data collection, especially when relating to planning and teaching. The variable 'understanding how to analyse data' was the only SSS variable in the Strategic Plan Target 1.4 that showed no improvement in 2023, remaining at the 2022 low result of 29%. Systematic use of data and evidence to drive the development and implementation of appropriate curriculum would assist with students having differentiated, and stimulating, learning and should work to also support the wellbeing goal and targets.	
Goal 3	Optimise each student's wellbeing and engagement in learning.	
12-month target 3.1-month target	Decrease the number of average absence days, from 31.2 per fulltime equivalent student in 2023, to less than 25.0 days in 2024.	

12-month target 3.2-month target	Improve Teacher concern from 33% in 2023 to 45% in 2024. Improve Student voice and agency from 45% in 2023 to 50% in 2024.	
12-month target 3.3-month target	Improve Promote student ownership of learning goals from 14% in 2023 to 45% in 2024. Improve Support growth and learning of the whole student from 43% in 2023 to 55% in 2024.	
Key Improvement Strategies		Is this KIS selected for focus this year?
KIS 3.a Positive climate for learning	Build organisational capability to respond to individual students' wellbeing, engagement and learning needs.	No
KIS 3.b Positive climate for learning	Empower students as active agents in their learning.	Yes
Explain why the school has selected this KIS as a focus for this year. Please make reference to the self-evaluation, relevant school data, the progress against School Strategic Plan (SSP) goals, targets, and the diagnosis of issues requiring particular attention.	Assessed as emerging in FISO Engagement, and looking at 2023 data, 'teacher concern' and 'student voice and agency' are 2 variables in the ATOSS data that only marginally increased in 2023. In the SSS, the variable 'promote student ownership of learning goals' decreased by more than half from 2022, being only 14% in 2023. Activation of student voice and agency, including in leadership and learning, to strengthen students' participation and engagement in school, by using a range strategies will ensure students are actively engaging in their learning should help to increase the results in these 3 variables, as both students and staff should see the students actively taking part in their learning.
